Workshop: Data integration exercises

Dr Jason Wong

Introductory bioinformatics for human genomics workshop, UNSW
Friday 29th January 2016
Exercise

The aim of this session is to demonstrate how different sources of data can be integrated.

The exercise involves identifying asthma associated GWAS SNPs that are most likely to be functional.
We will be using:
- UCSC Table Browser
- EBI Expression Atlas
- UCSC Variant Annotation Integrator
- regulomeDB
- Galaxy (to perform the analysis)
