Workshop: Exercises using UCSC genome browser and Galaxy
Session 2 – Rebecca Poulos

Introductory bioinformatics for human genomics workshop, UNSW
28th – 29th January 2016
Exercises

1. Using the UCSC Genome Browser
   - Create a UCSC Genome Browser session displaying tracks of interest to you

2. Using Galaxy to perform simple genome arithmetic
   - Use Galaxy to find regions of the genome which fulfil certain criteria

3. Integrating UCSC and Galaxy
   - Upload the dataset you created in Galaxy to the UCSC Genome Browser and view the output

4. Unguided exercise (*time permitting*)
